

The system for large-scale outdoor advertising

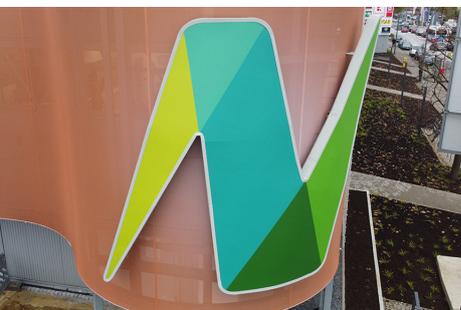

EPS.LUMI 2000

© Thomas Rebel

Benefits

- Suitable for large-scale applications
- Aluminium profiles for long-term use
- Four-sided frame profile for perfect clamping of the fabric by means of flexholder technology
- Custom shapes e.g. logos are possible

Classic applications:

- Illuminated sign cases
- Banner
- Illuminated ceiling
- Letters
- Custom shapes

Profile variety with system

Overview profile types

Main body profiles

- Main body profiles with a building depth of 120 mm and 180 mm
- Only a few components for fast, economical and easy assembly
- The low profile depth is well suited to LED frame lighting or large-area illumination
- The new design offers increased stability with the proven LUMI clamping technology

Retrofits

- The Retrofits AP 84 and AP 97 are optimized for LED illumination
- The front side of all of the profiles has a frameless design
- The motif can run right up to the outer edge of the profile
- As an assembly kit, they are also suitable for converting existing acrylic cases.

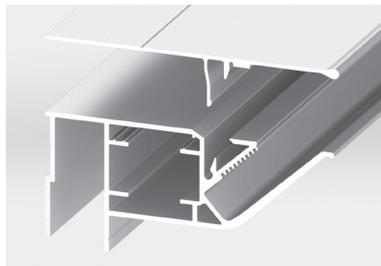

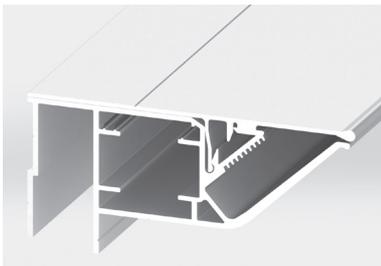

Double sided

- Basic profile, double-sided with a building depth of 200 mm
- Suitable for the construction of pylons, cantilevers or roof advertising systems
- New design offers high stability

Wide cover profiles

- Available for basic profiles in building depths of 120 and 180 mm
- Cover the entire profile width
- Also available anodized or RAL powder-coated

Well-proven technology

- Perfect tension due to flexholder technology
- Simple frame construction with few components
- Easy opening and re-clamping of the fabric area
- Maintenance and conversion costs are reduced significantly
- Custom forms are possible
