

The system for outdoor banner

EPS.LUMI-ADD

Benefits

- Fast installation with little effort
- Uniform accessories for modular construction
- Can be used for sliding shutters
- Low profile depths
- Special solution for recesses
- Supplies for wall mounting and tools available on request

Classic applications:

- Banner
- Exhibition stands
- Sun protection

Modular screwable frame system

The system has an adaptive and modular structure. Where it was necessary to weld so far, it can be put in multiple and easy need-based now. Based on the proven EPS. LUMI tensioning technology, the fabric is clamped perfectly.

The system can also be used as a sliding shutter and sunprotection.

Fast frame assembly

By using the various connectors, the frames can be mounted quickly and easily. Even sharp and butt angles, angular butt joints as well as spatial constructions can be realized. The wall mounting takes place by means of corner or wall bracket.
