

The perfect solution for niches and ceilings

EPS.LUMI GRIP

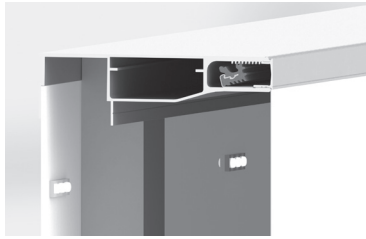

Benefits

- Suitable for large-scale applications
- Aluminium profiles for long-term use
- Four-sided frame profile for perfect clamping of the fabric by means of flexholder technology
- Special solution for recesses and suspended ceilings

Classic applications:

- Illuminated sign cases
- Banner
- Illuminated ceiling

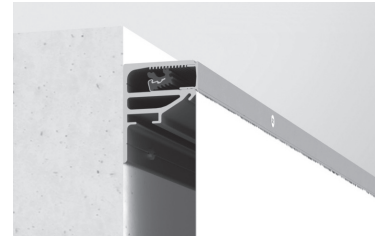

Profile variety with system

Main body
(Building depth 150 mm)

Retrofit JP
(Building depth 67 mm)

Front opening wallmounted
(Building depth 50 mm)

EPS.LUMI GRIP is particularly suitable for applications in areas that are difficult to access or for special applications such as niches or illuminated ceilings.

With just a few components, the main body profile is quick, inexpensive and easy to assemble. The shallow building depth is suitable for both LED frame and wide-area rear wall illumination.

The retrofit profiles are suitable for mounting on a substructure as well as for direct mounting on the wall.
