

The textile frame system for indoor and outdoor

EPS.STOR

Benefits

- Large selection of illuminated and unlit textile frames for inside and outside
- Fast change of motif without tools
- Frame on request with print and illumination

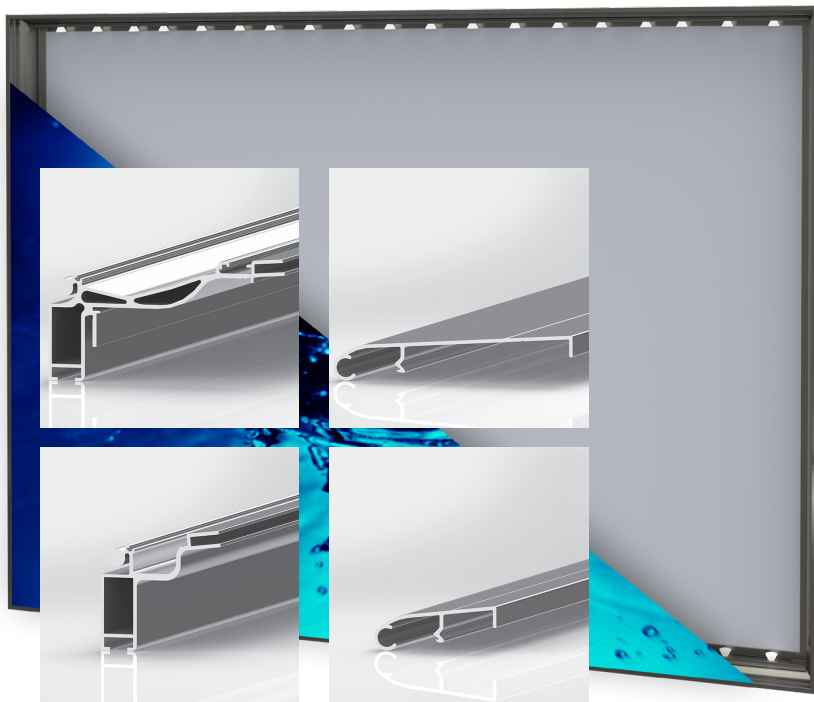

Classic applications:

- Illuminated signs
- Banner
- POS
- Exhibition stands
- Acoustics

Profile variety with system

EPS.STOR OUT

Our textile frames for outdoor use are available in a lit (depth 127 mm) and unlit version (depth 66 mm). Equipped with an innovative folding mechanism, EPS.STOR OUT not only tightens the fabric very fast, but also holds the tension reliably in wind and weather. Nevertheless, you can of course always change and reuse your motives easily and quickly without special tools.

EPS.STOR IN

With an additional large selection of textile frame profiles for the interior use, you can request a complete solution with print and illumination.

Whether at trade fairs and events, at the POS, as room finishing or for acoustics, the different depths of the profiles offer a multitude of possible applications.
