

Narrow, narrower

EPS.STOR IN surface light

Benefits

- Very flat installation depth possible
- Full-surface and homogeneous backlighting
- Quick fabric changes

Classic applications:

- Stores and trade fairs
- Hotel
- Gastronomy

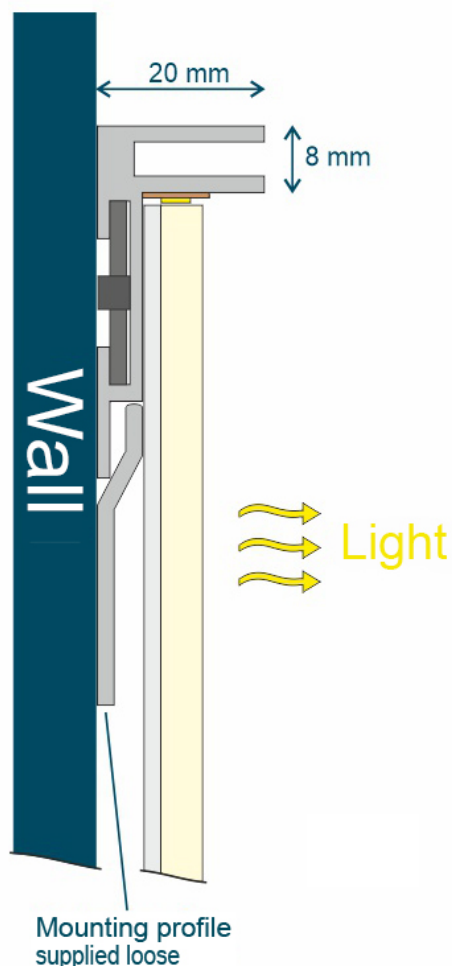

- Museums
- Offices
- Public buildings

Profile variety with system

LFF20

EPS SYSTEMS

Available with printed and ready-made tensioning fabric on request.

Particularly flat LED tensioned fabric frame for backlighting textile prints for indoor use.

The structure is a combination of PMMA acrylic glass, PCV rigid foam panels, LED strips and an aluminium frame. Full-surface and homogeneous backlighting is achieved.

Different construction depths

The frames are available in construction depths of 20 mm, 35 mm and 50 mm for double-sided applications.

Technical data

Protection class IP 40
Conformity CE, RoHS
Fire behavior Building material class A1 (DIN 4102)

Minimum dimensions 200x200 mm
Maximum width 3.050 mm
Maximum height 1500 mm (between LEDs)
