

System for quick banner solutions

EPS.TRIO

Benefits

- Stable frame system for large format outdoor applications
- Simple plug-in system
- Fast banner change possible

Classic applications:

- Banner
- Signs

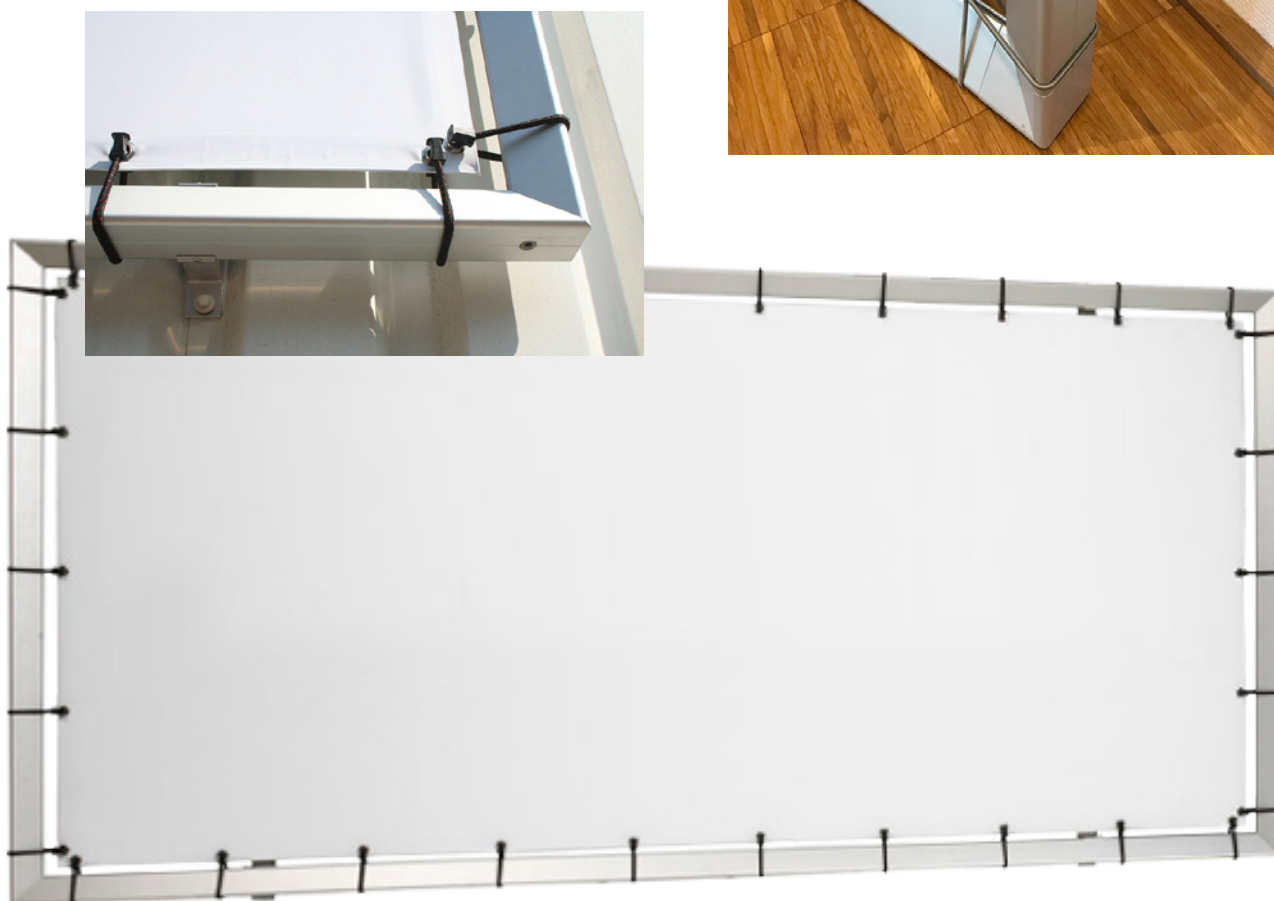

Profile variety with system

EPS.TRIO - Simple, fast and robust

- Frame profile with building depth of 60 mm
- Silver anodised
- Incl. ready-made corner profile and wall bracket
- Fabric is mounted by using eyelets and rope expanders, which achieves an even tension
- Mount for aluminum composite panels is also possible

EPS.TRIO is a lightweight aluminum triangular profile with many possible uses. It is suitable for banner frames, stand construction or signage.

The anodised profiles are durable and robust. Due to the simple assembly of the banner, a banner change can be easily carried out by one person and without tools.

Assembly by using rope expanders. This profile can also be used as a frame system for aluminium composite panels.
